DICCIONARIO MEDICO INGLES-ESPAÑOL

AVISO (NOTE)

Por lo general, pero no en absoluto, se han omitido las palabras manifiestamente compuestas, y aquellas formadas por la adición de vocablos latinos y griegos, ya prefijos o sufijos. Dada su equivalencia en ambos idiomas, tampoco hemos presentado la traducción de dichas voces, excepto en aquellos casos en que existían diferencias ortográficas. Para designar a los prefijos, hemos colocado un guión a continuación de ellos; para los sufijos, uno enfrente. Por ejemplo, *hyper-, -athy.*

Al traducir, conviene tener siempre presente la importantísima propiedad del idioma inglés de convertir un nombre, bien en adjetivo o en verbo. Por ej., *blood vessel,* vaso sanguíneo; *heart block,* bloqueo cardíaco; *pain* (dolor y doler), *rupture* (ruptura y rupturarse), *scalp* (cuero cabelludo y extirpar el cuero cabelludo).

PRONUNCIACION

Como ya hemos dicho, el mejor guía en el laberinto de la pronunciación es el oído; por no ser siempre posible disponer de este medio, hemos indicado (entre paréntesis) a continuación de cada palabra, la pronunciación y acentuación *aproximadas.* Las letras subrayadas son aquellas que representan sonidos sin correspondiente exacto en castellano:

a, como la *eu* francesa, como la *e* catalana en muchas palabras. Póngase la boca como para decir *e* y dígase *a.*

i, póngase la boca como para decir *e* y dígase *i,* produciendo un sonido breve y agudo.

o, póngase la boca como para decir *a* y digase *o,* produciendo un sonido breve y agudo.

a. = adjetivo
adv. = adverbio
arg. = argentinismo
gen. = general
guat. = guatemalteco
n. = nombre substantivo
pl. = plural
v. = verbo
vulg. = vulgo

Los que deseen familiarizarse más con las diferencias en el tecnicismo médico de ambos idiomas deberían consultar la obra "El Inglés para el Médico," publicada por la American Medical Association. Esta ha publicado también un Diccionario Español-Inglés.

ENGLISH-SPANISH MEDICAL DICTIONARY

NOTE (AVISO)

As a general, but not absolute, rule, obviously composite words have been omitted. Because of the similar form in both languages, a like action has been taken with respect to words formed by the addition, to the radical, of a prefix or a suffix. The equivalents of all such prefixes and suffixes have, however, been given. A dash at the end or the beginning designates both respectively. Thus, *hiper-, -atía.*

PRONUNCIATION

Spanish language is nearly phonetic.

When pronunciation is not indicated, pronounce Spanish characters as follows:

Ch, as in *child, "church."*

H, always silent, unless in the combination *ch.*

J, like *h.*

Ll, like *li* in *"million"* but stronger.

ñ, like *ni* in *"onion."*

R, sharp and rolling at the beginning or end of a word, the end of a syllable, when following *l, n* or *s,* and some times at the beginning of the syllable. In the last case it is written *rr.* In other cases just a little stronger than the English *r.*

X in Mexico is pronounced like *h.*

GENDER

The usual masculine terminations are: *o, e, i, u, j, l, ma, n, r, s, t, x;* feminine, *a, ad, ión, sis, tis, x.* Exceptions to the last rule are *cólera, coriza, zona.*

Those wishing to go further into the differences in the medical terminology of both languages may consult "Medical Spanish," published by the American Medical Association. A Spanish-English Dictionary has also been published.

earth (arz), tierra (tee-aih'rrah) ; **e. eating,** geofagia, geofagismo

earthy (arzi), térreo-a (tay'rray-oe), terroso-a (-rro'soe)

eat (iit), comer (coe-maihr')

eatable (ítabal), comestible (-mays-tee'blay)

Eberth's bacillus, bacilo de E.

ebullition (ebiulichan), ebullición (ay-boo-llee-theeoehn')

eburnation (ebarnechan), eburnación (-boor-nahr-), eburneación, eburnificación (-nee-fee-cah-)

eburneous (ibárneas), ebúrneo-a ('nay-oe)

ecballium (ecbáliam), cohombrillo (coe-ohm-bree'lloe)

ecbolic (-bólic), ecbólico-a (ayc-boe'lee-coe)

eccentric (-séntric), excéntrico-a (aix-thaihn'tree-coe)

ecchondroma (-condrouma), econdroma (aih-cohn-droe'mah)

ecchymosis (equimousis), equimosis (-kee-moe'sees)

ecchymotic (-mótic), equimótico-a ('tee-coe)

eccyesis (-saiisis), ecciesis (ec-thee-ay'sees)

echino-, equino-

echinococcosis (equinococousis), equinococosis (aih-kee-noe-coe-coe'sees), hidatidosis (ee-dah-tee-doe')

echinococcus (-cocas), equinococo, hidátide ('tee-day) ; **e. cyst,** quiste hidatídico, hidatidosis

echinorhynchus (-rincas), equinorrinco (-rreen'coe)

echinosis (-nousis), equinosis ('sees), crenación (cray-nah-theeoehn')

echo-, eco-

echo (eco), eco ; **e. sign,** signo del eco

echolalia (-lelia), ecolalia (-lah'-lee-ah)

eclampsia (eclampsia), eclampsia (-clahmp'see-) ; **e. patient,** eclámptica

eclamptic (-tic), eclámptico-a ('tee-coe), eclámpsico-a

eclectic (ecléctic), ecléctico-a (-clayc')

eclecticism (-sism), eclecticismo (-tee-thees'moe)

ecology (ecóloyi), ecología (-coe-loe-hee'ah)

economy (-nomi), economía (-noe-mee')

ectasy (écstasi), éxtasis (aix'tah-sees)

-ectasia, -ectasía

ectasia (ectasia), **ectasis** (éctasis), ectasia (aihc-tah'see-ah), éctasis

ectatic (-tátic), ectático-a (-tah'-tee-coe), ectásico-a

ecthyma (eczaima), ectima (-tee'-mah)

ecto-, ecto-

ectoblast (éctoblast), ectodermo (-toe- daihr' moe), ectoblasto (-blahs'toe)

ectoderm (-darm), ectodermo

ectodermal (-dérmal), ectodérmico-a ('mee-coe)

ectomere (éctomiar), ectómera ('may-rah)

-ectomy, -ectomía

ectopia (-toupia), **ectopy** (éctopi), ectopia ('pee-ah)

ectopic (-tópic), ectópico-a ('pee-coe)

ectozoon (-ssúon), ectozoo (-thóe-oe), ectoparásito (-pah-rah'see-toe)

ectro-, ectro-

ectropion (-troupian), **ectropium** (-piam), ectropión (-troe-pee-oehn')

eczema (-ssima), eczema (-thay'-mah)

eczematous, (-zímatas), eczematoso-a (-toe'soe)

edema (edima), edema (ay-day')

edematous (edímatas), edematoso-a (-toe'soe)

edestin (edestin), edestina (-days-tee'nah)

edge (edch), borde (bohr'day), reborde; (wound), labio

edible (édibal), édulo (aih'doo-loe), comestible (coe-maihs-tee'blay)

education (ediuqueschan), educación (-dee-cah-thee-oehn')

edulcorant (idálcorant), edulcorante (-dool-coe-rahn'tay)

edulcorate (-reit), edulcorar (-rahr'), endulzar (aihn-dool-thahr')

effect (ifect), efecto (-faihc'toe)

efferent (éferent), eferente (-fay-raihn'tay)

effervescent (efarvésant), efervescente (-faihr-vays-thaihn')

efficacious (efiquechas), eficaz (-fee-cath')

efficacy (efícasi), eficacia (-cah'-thee-ah)

efficiency (efíchensi), eficacia

efficient (efíchent), eficaz

effleurage (eflarach), efleuraje (-flay-oo-rah'hay), effleurage

efflorescence (eflorésens), eflorescencia (-floe-rays-thaihn'thee-ah),

efflorescent (-ant), eflorescente ('tay)

effluvium (efláviam), efluvio (-floo'-vee-oe), emanación (mah-nah-thee-oehn'), exhalación (aix-ah-lah-)

effort (éfart), esfuerzo (ays-foo-aihr'thoe)

effusión (efluschan), efusión (-foo-see-oehn'), derrame (day-rrah'-may); **abdominal blood e.**, hemoperitoneo
